### about the harvest

All grapes were hand picked in small lug boxes.

### in the cellar

Grapes were pre cooled to 5° and sorted twice before a pure yeast culture was inoculated. The juice was pumped over the skins 3 - 5 times per day for 5 days. Once fermentation was complete, the wine was drained of the primary lees and transferred to a resting tank. Malolactic fermentation and a brief settling period preceded the wine to a combination of 225 liter barrels of French (25% first fill) and the rest second and third fill and fourth fill). The wine spent between 12- 14 months in barrel before bottling and labelling.
