100% Sangiovese

about the harvest

All grapes were hand picked.

in the cellar

Grapes were sorted twice before a pure yeast culture, BM 45, was inoculated. The juice was pumped over the skins 3-5 times per day for 5 days. Once fermentation was complete, the wine was drained of the primary lees and transferred to a resting tank. Malolactic fermentation and a brief settling period preceded the wine to a combination of 225 litre of French and Hungarian oak types.
