about the harvest

All grapes were hand picked.

in the cellar

All grapes were hand picked and sorted before a pure yeast culture, BM 45, was inoculated. The juice was pumped over the skins 3-5 times per day for 5 days. Once fermentation was complete, the wine was drained of the primary lees and transferred to a resting tank. Malolactic fermentation and a brief settling period preceded the wine to a combination of 225 litre of French oak for 12 months.
